

# SEAL It

## EMERGENCY VALVE SEALANT

**“Don` t Remove a Leaky Valve from the Pipeline, *Seal It.*”**

Some Emergency Valve Sealants on the market today set-up or can only be used in larger valves due to the particle size of flakes. *Seal It Emergency Valve Sealant* can be used by anyone in the field, on any valve with sealant injection fittings. *Seal It Emergency Valve Sealant* does not contain white flakes, which makes it safe for large or small valves. *Seal It Emergency Valve Sealant* should only be used after you have verified the valve is in the fully closed position and the seats are leaking. *Seal It Emergency Valve Sealant* will seal most leaks but not all. If you have a large leak or a question, please contact CSN Solutions, Inc.

*Seal It Emergency Valve Sealant* is available in:

- SI-CT - 10 ea Cartridges per box
- SI-10 - 10 lb Pail
- SI-5G - 5 Gallon Pail
